Mercades) Maintaining Hotel
services, Rigging, Carpentry,
plumbing, Sail Making/upholstery
Crew training

PROFILE

After some sailing experiences growing up my yachting career properly started in 2011, first as an engineer in a small shipyard then onto busy private and charter superyachts. During 6 seasons Between the Med and Caribbean I learnt the importance of high standards and exceptional service. I took these skills to smaller sail yacht charters and deliveries. Running sail yachts up to 60ft in the Med, Caribbean and Pacific Islands I gained experience in passage planning, sail instructing, guests management, engineering, carpentry and plumbing. Meeting Klevisa and working together was the highlight; in our time between running successful charter yachts we sail and maintain our own small sailing yacht. We share a passion for life and a positive outlook. We are currently looking for a permanent position running a family owned yacht.

Interior Detailing

PROFILE

Growing up above my parents restaurant in Greece and surrounded by hospitality and great food, looking after people comes naturally to me. Falling into a job on a boat while in Santorini 6 years ago, a love for sailing and the sea was born. Meeting Charlie was not just a highlight on my personal life but also our careers. Combining our professional backgrounds, hard work ethic and excitement for life we managed to have two very successful years of sailing a variety of different charter boats around the Med and the Pacific Islands. Currently living aboard our own small sailing yacht in New Zealand and working towards making it the perfect home for us in the future. Our goal for this season is to find a new working environment that's going to challenge us and improve our skill set.
